

Proof & Content Intake Kit

Everything the new site needs from you —
in the order it matters.

For: David Latimer · **Purpose:** Fill the 63 site placeholders · **Prepared:** August 7, 2026

Answer in your own words — short is fine. Photos/videos: just note the filename or link. The site is built and waiting; these answers drop straight in.

START HERE

The 20% that unblocks the most

If you only do one page today, do the proof section — it's what carries the agency and consulting pages, and it's the hardest to fake. Everything else can trickle in.

Priority order

- ◆ **1. Proof** — 2–3 deployment stories, references, certification records, video links. **HIGHEST**
- ◆ **2. The numbers** — the four headline stats + course prices. **HIGHEST**
- ◆ **3. Your story** — bio + the origin of "field, not yard." **HIGH**
- ◆ **4. The standard** — what the K9 Alliance standard actually tests. **HIGH**
- ◆ **5. Logistics** — hours, timelines, financing, what's included. **MEDIUM**

One-line gut check: what's the single most impressive, true thing a dog or team of yours has done in the field?

This may become the headline proof point on the home page.

SECTION 1

The Numbers

These fill the hero stat band and pricing. Rough but honest is better than blank — round numbers are fine.

Year you started / founded the operation

.....

Years of operational experience (headline stat)

.....

Approx. teams trained & deployed

.....

Approx. agencies / organizations served

.....

Course price anchors (for the "from \$X" transparency play)

Handler Certification — from \$

and typical duration + next cohort date

.....

Instructor Certification — from \$

.....

Foundation Scent Detection — from \$

.....

Field Deployment Training — price or "inquiry"?

.....

Detection dog placement — typical price band(s) by discipline, or keep as inquiry?

.....

Proof & Case Studies

For each case study, just answer three things: the situation, what your dog/team did, and the outcome. No names you don't have permission to use.

Case study 1

Situation → what the team did → measurable outcome

e.g. "Agency X needed... our team located... result was..."

Case study 2

Case study 3

References, Testimonials & Video

Agency reference / testimonial + who to credit

Name, title, agency — and confirm you have permission

Handler / trainer testimonial + credit

Commercial client testimonial (bed bug / arson / conservation) + credit

Consulting client testimonial + credit

YouTube video links to embed (Proof + Home)

Paste URLs from your channel

Certification records / photos you can share

Note filenames or links; these back up the agency page

SECTION 3

Your Story & The Standard

Your background — operational experience, disciplines, years, notable work

2–3 paragraphs, your voice. Bullet points are fine; we'll shape them.

The origin of "proven in the field, not just the yard" — what did you see fail, and what did you build to fix it?

Key credentials / certifications to list

Portrait / working photo of you — filename or link

The K9 Alliance Standard

In plain terms, what is the K9 Alliance Certification Standard?

What it tests, how it's scored, who recognizes it

Do you evaluate / certify teams you didn't train (externally sourced)?

SECTION 4

Logistics & Fine Print

Business hours

.....

Typical response time to promise on forms

e.g. "within 1 business day"

.....

Do you offer financing / payment plans for courses?

.....

Course prerequisites (per program, if any)

.....

Lodging / travel info + any hybrid or online elements

.....

Typical lead times / timelines (dogs & courses)

.....

What's included with a dog placement + maintenance package terms

.....

Detection dogs: green, started, or finished — what do you offer?

.....

Any other disciplines to list, or federal/TSA-type approvals to note?

SECTION 5

Two Technical Wires (for whoever launches)

Form endpoint

Create a Formspree/Basin/CRM form and paste the URL — replaces the placeholder so leads actually reach you

Analytics account

GA4 / Plausible / Fathom — paste the snippet or ID

Hosting + domain access

Where will it live (Netlify/Cloudflare/host), and who controls the k9school.net DNS?

Send this back however's easiest — typed, photographed, or voice-noted and I'll transcribe. The moment proof + numbers land, I'll drop them in and hand you a launch-ready build.
